BINDING

ice Binder BQ-500

Next Generation Perfect Binder

All Connected...

i = Intelligence, Integration, Interaction **C** = Connection **E** = Efficiency

Optimize the finishing process with automation and workflow.

The iCE series is a new product line-up which is designed to provide added value to our customers. A new operator interface for a more intuitive operation, and advanced automation to provide increased efficiency and productivity. In addition, connecting with an iCE LiNK workflow system provides an advanced and totally connected work environment.

NEXT GENERATION BOOK BINDER WITH CONNECTED FEATURES.

New level of automation brings binding quality to the next level.

FEATURE

HIGH PRODUCTIVITY

The BQ-500 excels at and is the most productive binder for book-of-one production. In addition, productivity is increased on longer runs with decreased set-up time and improved system efficiencies.

HIGH QUALITY

A uniquely designed template feature produces high quality books even with a non-skilled operator. Knowledge from a skilled operator can be stored in custom templates to produce consistent high quality books by any operator.

EVA & PUR

The BQ-500 supports both EVA and PUR hotmelt glue. Two different tanks are available and interchangeable for each glue type.

ICE TRIMMER HT-300 Three-side Trimmer

CONFIGURATION FLEXIBILITY

The system can be connected with various options to extend capabilities. A cover slitting unit, cover reject unit, elevator unit, glued book block feeder, loose sheet book block feeder, and in-line three knife trimmer are all available options with the BQ-500.

MANAGE YOUR BINDERY WITH HORIZON'S BINDERY **CONTROL SYSTEM**

The iCE Series can be enhanced with automated workflow from upstream to postpress with iCE LiNK, which uses cloud technology, and is Horizon's next generation bindery control system.

iCE BINDER BQ-500 Perfect Binder

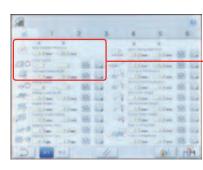

DETAILED PROCESS FEATURES.

Exclusive new features for improved production and quality.

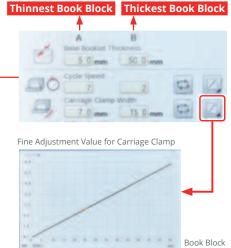

1 **TOUCH PANEL DISPLAY**

The 12.1 inch color touch-screen is icon-based for user-friendly operation. Setup, operation and fine tuning can be done at the touchscreen. Ergonomically designed slide operator console for operation efficiency, with loading and operation from either the left or right side.

Customized templates can be created according to desired book quality, paper type and other factors. These customized templates can be created by a key operator or manager who controls the quality. Once a template is created, the operator just selects the desired template to setup the system. This enables any operator to produce consistent quality books with improved production efficiency and greater quality control.

To create a template, set-up for the thinnest book and thickest book and it automatically calculates the value in between.

Thickness

2 **BOOK FEEDING SECTION**

3 **MILLING SECTION**

A rigid clamping system holds the book block firmly in position during the milling and nipping process to produce a quality finished book. The safety curtain ensures risk-free operation.

to 4 mm or 0" to 0.157".

6

A strong rigid nipping mechanism and positive jogging guarantees precise alignment of the cover to the book block and square spines. Nipping width, height, operating time and delay time are adjusted automatically according to book thickness.

8 **COVER FEEDING SECTION**

The high capacity cover feed station has a maximum pile height of 150 mm or 5.9" for continuous binding operation. The cover feeder can handle can be delivered without damage or a wide range of covers: Bond Paper 81.4 to 302.4 gsm and Coated Paper 104.7 to 348.9 gsm.

marking.

Powerful servo motor driven milling and notching mechanism mills the spine of the book block or signatures for optimum glue penetration and adhesion. Milling rotation speed can be adjusted automatically according to book thickness and custom template. Milling depth can be adjusted from 0

COVER REGISTRATION SECTION

After transport to the nipping section, the cover is registered precisely with the fore-edge guide and tail-edge positioning guides.

GLUE TANK SECTION

Dual application rollers and side gluing rollers ensure superior glue application to the spine and excellent adhesion of the cover for consistent quality binding. Glue roller height, wiper opening and cut-off timing, scraper roller height, and side glue roller width are automated.

7 SCORING SECTION

The scoring width and position are automatically set-up according to book block thickness and cover registration. Scoring is performed on thick covers for professional binding with sharp, square spines and hinge scores.

Uniquely designed delivery eliminates damage to the spine. Even 65 mm or 2.56" thick books or PUR bound books

OPTIONS.

Automated Book Block Feeding System For the BQ-500.

FEATURES OF EL-480 + BBF-480

HIGH PRODUCTIVITY

Book blocks are fed automatically at high speed. The maximum speed is 1,000 book blocks per hour.

EFFICIENT AND HIGH SECURITY PRODUCTION

This system features various functions for efficient and high security production.

- Book thickness caliper is equipped to setup the binder.
- Optional book block and cover matching system is available.
- Optional cover reject function is available to reject mis-matched covers.

USE OFFLINE

The system can be converted to an offline manual feeding system. Uniquely designed bridge conveyor and slide track enables quick and easy change over from an inline to offline system.

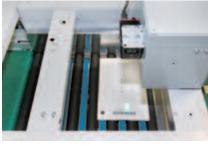

1 **EL-480 ELEVATOR CONVEYOR**

This system elevates the book block from upstream conveying to the infeed height of the BBF-480.

2 BOOK BLOCK THICKNESS CALIPER / BARCODE READER Option

The book block thickness caliper is equipped on the BBF-480. This caliper measures the thickness of the book block accurately for automatic setup of the BQ-500 perfect binder. Optional barcode reader BC-BBF480 is available to match book block and cover for higher security production. The BC-BBF480 is also capable of comparing the actual book block thickness measured at the caliper to that in the data, if provided via barcode.

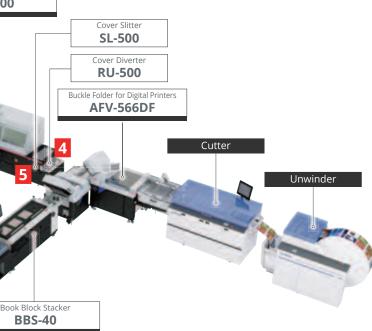

Variable Three-Knife Trimmer 4-Clamp Binder **BQ-500** HT-1000V Book Block Feeder **BBF-480** Elevator Convevo EL-480 Buffer Conveyor BCV-1/2/3 Inverter Box INV-EL480

3 **INFEED SECTION**

Uniquely designed feeding mechanism enables feeding and registering of variable thickness book blocks automatically.

Option for BQ-500 COVER REJECT SECTION (RU-500 COVER DIVERTER)

Optional cover reject device is available to reject the cover in case the cover does not match the book block.

SLITTER UNIT SECTION (SL-500 COVER SLITTER)

Option for BQ-500

Optional cover slitting device to slit both edges of the cover to eliminate cover over hang for easy handling and increased accuracy at the three knife trimmer.

OPTIONS.

Performance Enhancing Options.

MU-500PUR PUR SPINE GLUE TANK

Polyurethane reactive adhesive suitable for coated stock. Layflat binding can be performed.

MU-500EVA EVA SPINE GLUE TANK

 Commonly used for many types of binding. The melted glue can be used repeatedly so there's no need to clean the tank after operation

MU-500PUR: Cleaning and Replacement

The application drums and back spinner lift and latch to provide easy access for cleaning of the tank.

Install the special drain for glue run-off. The PUR tank and drums are teflon coated so that the remaining glue can be easily peeled off after cooling.

Sliding rail glue tank for easy replacement. Pull out the tank and remove it with the optional lifting trolley.

L-470 MANUAL SIMPLE LIFTER

The L-470 is a lifting dolly for easy and safe tank replacement.

The F-470 fork is a custom-fit

attachment for the lifter that holds the glue tank firmly in position for easy and safe tank replacement.

F-470 FORK FOR LIFTER

M-470 GLUE MELTING HEATER

The M-470 is a laboratory oven used to premelt the PUR hotmelt glue.

PM-470 PREMELT TANK (18 LITTER)

The PM-470 is the premelt tank for EVA hotmelt glue.

CN-480 PRE-MELT TANK CONNECTION KIT VS-280 SMOKE EXTRACTOR

This is required to connect the PM-470 with the BQ-500.

SI-500A BOOK THICKNESS INPUT CALIPER ET-500 EXTRA TABLE

The SI-500A is a book thickness measuring and input device for increased operational efficiency.

EBT-500 SUPPORT TABLE

This extends the table on the book block feed section 90 mm or 3.54" to the front.

BC-480-1D 1D CODE READER

This supports both 1D and 2D codes for the book block and only 1D code for the cover sheet. Code Types: Barcode CODE39, CODE128, EAN, JAN 2D Code QR Code, Data Matrix

S-470 STAND FOR MELT TANK UNIT

The S-470 stand is designed to receive and hold the glue tank unit after replacement.

B-470 TEFLON COATED BEAKER

The B-470 teflon coated beaker can be used to premelt the PUR hotmelt glue to refill the glue tank

This deodorizes the smell of hotmelt glue.

This table is required to install the SI-500A. You can also use this table as a work table.

FLP-480 FLAP COVER KIT

• The fold lines for the flap covers can be scored in-line. The flap covers are folded inward along the scoring lines after binding.

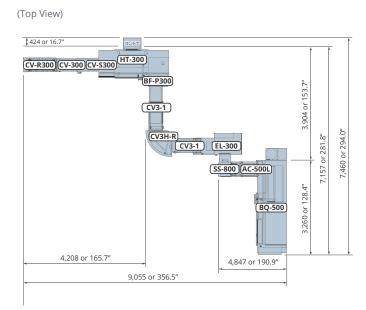

BC-480-2D 2D CODE READER

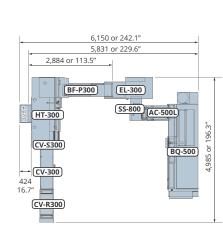

This supports both 1D and 2D codes on the both book block and cover sheet. Code Types: Barcode CODE39, CODE128, EAN, JAN 2D Code QR Code, Data Matrix

		BQ-500	
Binding Type	Binding with milling, Binding without milling and Pad binding		
Glue Type	EVA Glue or PUR Glue (Tank is optional)		
Number of Carriage Clamps	4		
Book Block Size	For edg Lengh	Spine Length x Fore-edge Length Max. 320 x 320 mm or 12.59" x 12.59" Min. 145 x 105 mm or 5.71" x 4.14"	
Book Block Thickness	Min. 1 mm or 0.04" Max. 65 mm or 2.56"		
Cover Size	width	Length x Width Max. 320 x 670 mm or 12.59" x 26.37" Min. 135 x 225 mm or 5.32" x 8.86"	
Cover Weight Range	Normal Paper 81.4 to 302.4 gsm Coated Paper 104.7 to 348.9 gsm		
Cover Stack Height	Max. 150 mm or 5.9″		
Cycle Speed	Cover Binding (EVA glue)	Max. 1,350 cycles per hour (EVA)	
	Cover Binding (PUR glue)	Max. 1,000 cycles per hour (PUR)	
	Pad Binding	Based on the cover binding (The glue temperature differs depending on condition	
	Lining Binding	Max. 900 cycles per hour	
	Variable Binding	Max. 810 cycles per hour (when difference in thickness is 5 mm or les (You will need the optional SI-500A Book Thickness Input Caliper for this function.)	
Voltage/Frequency	3-phase 200-208 V, 60 Hz 3-phase 220 V, 50 or 60 Hz 3-phase 400 V, 50 or 60 Hz (The external transformer is necessary for 220 V or 400 V		
Machine Dimensions	Delivery Conveyor (long type), and milling blower duct: 3,670 (W) \times 2,340 (D) \times 1,840 mm (H) (+ pole lamp 215 mm or 144.5" (W) \times 92.2" (D) \times 72.5"(H) (+ pole lamp 8.5")		
	Without delivery stacker and milling blower duct: 3,260 (W) × 1,130 (D) × 1,840 (H) mm (+ pole lamp 215 mm or 128.4" (W) × 44.5" (D) × 72.5" (H) (+ pole lamp 8.5")
